

This drawing is based on a computer-generated Zone of Theoretical Visibility (ZTV). The areas shown indicate the theoretical visibility of the proposed turbines using OS Terrain 50 data and do not take account of any screening from minor variations in the landform, vegetation or built form. The ZTV also includes an adjustment that allows for the Curvature and Light Refraction of the Earth. This figure has been based on the following parameters: Set out the accurate Blade Tip Turbine Height (200 m) and the Eye Level Height (2 m) used for the ZTV.

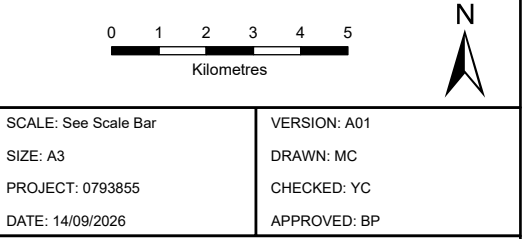

Figure 5.6
Turbine Blade Tip Height Zone of Theoretical Visibility to 20 km
