

Project timeline

We are at the very early stages of our project development. We are embarking upon a series of environmental surveys.

The findings from our studies, alongside feedback from local stakeholders and statutory consultees, will help to refine our final plans which will be subject to further consultation prior to our application submission.

Development process

Thank you

Thank you for taking the time to attend our public exhibition. Please take a moment to complete a feedback form. For ease, all of the exhibition materials will be available to download on the project website.
